

ABSTRACT

Methods and systems are provided for controlling the disclosure of sensitive information. Disclosure is controlled in the sense that (a) the information is not disclosed until predefined conditions are met, such as the passage of a certain time without an
5 authorized update request for secrecy, (b) copies of the information are protected by encryption and by widespread, unpredictable storage, so that at least one copy will be available when disclosure is required, (c) the information is kept secret until disclosure is required, and (d) when disclosure is required, the information is sent to predefined destinations such as email addresses or posted to web sites, in a predefined format.
